Let's get to work.

Preparation

1. Attach your chosen shovel holder (e.g. Quickfst/ STOW iT Utility Holder) to the bracket with the fasteners supplied with the mount.

Installation

2. Place the Tee bolts in the outer channel of the roof rack, and slide them into position.
3. Place the supplied Shovel Mount brackets over the tee bolt threads, and loosely attach with the washers and nyloc nuts, as pictured.
4. With the brackets loosely in position, confirm that the spacing between them matches the length of the shovel being used. Once confirmed, fasten completely.
5. That's it, you're done!
You can now secure your shovel to your roof rack, for quick and easy access.
