Bolt Torque

DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	5 Nm	9 Nm	22 Nm	44 Nm	77 Nm

Let's get to work.

Preparation

1. It's best if we get the mounting pins attached to the Recovery board first. If you ordered a set of pins, these will have been included. If you already had some, that's great! If you've lost them, we know a place you can buy some...
2. The genuine Maxtrax Mounting Pin Set contains 4 x pins, 4 x nyloc nuts and 4 x washers. We find it easiest to attach the pins to the mount by holding the pin in place with a spanner, while using a socket to tighten the nut.
3. Ensure the final position of the pin matches the same orientation as the keyholes of your Maxtrax. This can vary, depending on your desired bracket placement.

Installation

1. Workout the desired placement of the Mounting Board in relation to your cross bars.
2. Place a T-bolt into the Mounting Board slots from underneath, securing loosely with a washer and nut, as pictured.
3. Thread the T-bolts into the cross bar channels and twist to seat the nuts across the channel opening. Tighten to secure.
4. That's it, you're done! Now you can secure your Maxtrax easily, and simply fold the pins down when you don't need them!

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
