## Bolt Torque

DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	5 Nm	9 Nm	22 Nm	44 Nm	77 Nm

# Let's get to work.

---

## Installation

1. We want a nice clean starting surface, so remove any dirt and debris from the mounting surfaces.
2. Place the guard in place over the electric handbrake.
3. Loosely secure the top mount using an M8 bolt and washer.
4. On the bottom mount, slide the M10 washer underneath the guard and against the electric handbrake to act as a spacer. Secure in place using the other M8 bolt and washer.

---

## Installation cont.

5. Using an allen key, tighten the bolts to the recommended torque settings.
6. Repeat steps 1-5 on the other side of the vehicle with the other guard.
7. That's it, you're done!  
All that's left to do is hit the road.

## **Local Knowledge & Assistance**

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
