DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	6 Nm	10 Nm	15 Nm	22 Nm	35 Nm

Let's get to work.

Installation

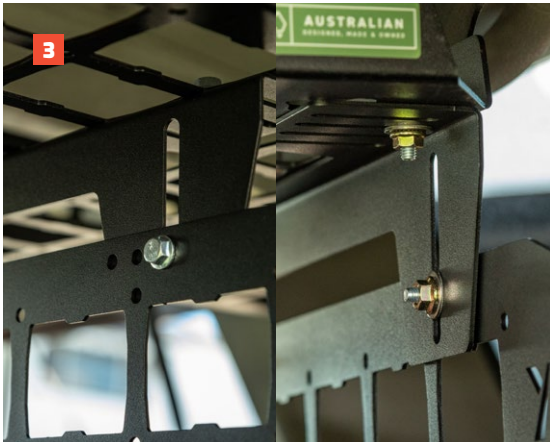

1. First of all, we need to work out the best spot for your new divider to be mounted. The Mounting Brackets can be mounted in either direction, and have adjustment sideways as well as forwards and backwards on the shelf.
2. With the desired position confirmed, thread the provided screws from above through the holes in your shelf, and place the Mounting Bracket underneath. Loosely secure with the provided washers and nuts.

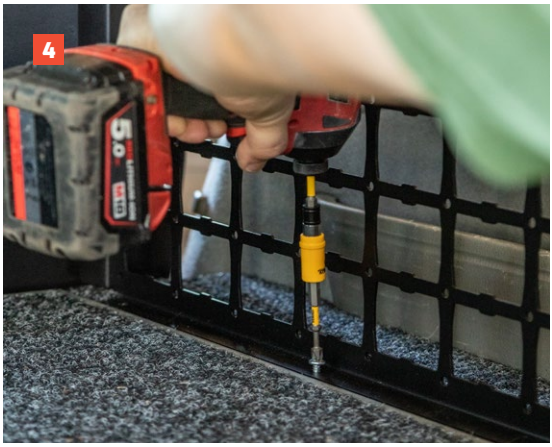

Installation cont.

3. With the bracket mounted, select one of the three desired mounting holes and mount the divider, ensuring the washer is placed on the same side as the Mounting Bracket adjustment slot.
4. Secure the Cargo Divider to the top of your drawers using the provided self-tapping screws and washers.
5. With the Cargo Divider place, tighten all the screws.
6. That's it, your new divider is ready to go! Attach a couple of QuickFists with a hatchet or extinguisher using the holes, or even mount a MOLLE first aid kit by weaving it through the mesh panels.

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
