G8.8 Bolt Torque (Non-Lubricated)					
DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	6 Nm	10 Nm	15 Nm	22 Nm	35 Nm

Let's get to work.

Installation

1. We recommend you attach your chosen mount to the Shovel Holder Mounting Bracket prior to affixing it to your roof rack. If you've ordered yours with QuickFists, use the provided hardware. Otherwise the mount is also compatible with Rhino-Rack Stow It and Yakima AceO'Spades shovel holders.
2. As all the hardware is Stainless Steel, we highly recommend placing some anti-sieze compound into the Clamp threads.
3. Loosely attach the smaller clamping plate to the main bracket using an M8 bolt and washer as pictured.
4. Align the clamp with the edge of the roof rack, ensuring the clamp is seated correctly in the dovetail join, flush against the roof rack. Ensure there are no gaps and that the clamping flanges are positively engaged on the dovetail. Work out the desired placement based on the length of your handle and placement of the shovel blade, and tighten using a hex key.
5. Repeat for the other side.
6. Voila, you're done!

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
