4	M3 x 8 Button Head Socket Screw		

Time 30 minutes / Half a beer

For further information contact KAON on **07 3180 1470** or **info@kaon.com.au**

Let's get to work.

Preparation

1. First step in preparing your console is to decide on and source the switches and 12V accessories you want for your setup. It's easier to install these within the console before fitting it in the vehicle.

   The inner three holes suit rocker switches or dimensionally similar accessories, and the outer two are standard 12V accessory sockets.

2. Install your chosen components to the switch fascia in the configuration of your choice.

3. Slide the switch fascia into the underside of the mounting plate, taking care to route any wiring through the openings in the rear of the fascia.

4. Secure the fascia to the mounting plate using the M3 screws.

Installation

5. Identify the desired mounting position for your console. The console has two sets of mounting holes to suit mounting in both directions on the KAON Standalone Shelf, Divider and Molle Mesh.

   We also provide a clamping plate that you can opt to use. The plate allows for the Console to be clamped in any position on our storage range.

   Please note the clamping plate is required for mounting to Barrier Shelves and Light Cargo Barriers.

6. Secure using the provided M5 screws.

7. With the console installed, it's over to you for wiring to suit your setup.

   We provide a series of cable management plugs and cable ties that push-fit into the M6 holes of our molle mesh. These can be used to neatly route wires to accessories or power.

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
