G8.8 Bolt Torque (Non-Lubricated)					
DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	6 Nm	10 Nm	15 Nm	22 Nm	35 Nm

Let's get to work.

Installation

1. Pop the bonnet and locate the bracket's mounting position on the radiator.
2. Push the side bracket over the side spigot and into position.
3. Position the top bracket by pushing the bent vertical tab into the recess at the back of the radiator, and threading the hole in the bracket over the top plastic spigot.

Installation cont.

4. Align the bolt holes on both brackets and secure using the hardware supplied.
5. Square up the brackets and tighten both screws to the recommended torque settings.
6. That's it, you're done!
   You can now change your battery with peace of mind that your radiator is protected.

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
